Subject: [SWMM-USERS] Excel add-in problems SWMM5

Hello Mathias,
Past discussions of Excel and SWMM5

<https://www.openswmm.org/Topic/3533/swmm-5-excel>

<https://www.openswmm.org/Topic/6547/excel-add-on-tool-import-issues>

Regarding your "List index out of bounds (2)." It might help if you close the SWMM5 GUI and then open the file. Your error message means you have some data problems,

Regards,

Subject: Excel add-in problems SWMM5

I'm trying to use the Excel add-in for SWMM5 in EPASWMM.

When starting the add-in tool, SWMM shuts down and excel opens. When saving and closing down Excel, SWMM opens, but I get this error message: List index out of bounds (2). Then it's not possible to click on anything inside the model.

This happens even if I don't edit anything in the Excel file.

I use these configurations:
Tool properties:
Tool Name: Excel
Program: Path to Excel16
Working Directory: Blanc
Parameters: \$INPFILE

Disable SWMM while executing: checked
Update SWMM after closing: checked

Preferences:
Tab Delimited Project File: Checked

I would really appreciate any assistance!
